Hyderabad, Telangana - 500087, INDIA

## OBJECTIVE

Aspiring full-stack developer seeking to leverage strong skills in frontend and backend technologies to build scalable and user-friendly web applications. Passionate about delivering innovative solutions and contributing to a dynamic, growth-driven environment.

## SKILLS

- **Programming Languages:** C, C++, Java, python
- **Web Technologies:** HTML, CSS, Javascript, Node.js
- **Cloud Computing:** AWS
- **Database Systems:** MySQL

## PROJECTS

- **Conversational Agent Using NLP** *Python, JavaScript, AWS, NLP, SQL*
  - Information Access: Developed a chatbot system that enables students to quickly retrieve college information, significantly reducing time spent searching for details.
  - Improved User Experience: Integrated NLP-based microservices to handle diverse student queries, ensuring an intuitive and responsive system.
- **Sentiment Analysis for Social Media Platforms** *Python, JavaScript, CrewAI, NLP*
  - Developed a sentiment analysis system with Crew AI to classify social media posts as positive, negative, or neutral, using advanced NLP techniques for better insights.
  - Automated the process of extracting and categorizing sentiments from large datasets, improving efficiency and providing deeper insights for decision-making.
